

Hi. My name is Dave Slotter, W3DJS, and I, like many of you was a victim of the so-called “Family Courts”. Prior to my divorce from my first wife, I was a father to two loving sons. After my divorce, at first I became a “non-custodial parent”, which is fancy talk for “a visitor” to my kids. Then, when the children’s mother realized she could do anything she wanted without repercussions, alienated me from my children. *As of Father’s Day 2020, it will have been 8 years since I have spoken to my children.* I sent them both a letter six months ago, and it has gone unanswered.

Maybe you haven’t personally been a victim of the so-called “Family Courts”, but it’s a safe bet you know someone who has been. I would like to let you know that the official charities of the HamPi software image for the Raspberry Pi are [The Father’s Rights Movement](#) and the [Americans for Equal Shared Parenting](#).

If you find HamPi useful and you want to give back, please consider donating \$2 (or more) to [The Father’s Rights Movement](#) or to [Americans for Equal Shared Parenting](#). When the predecessor image to HamPi was released, there were over 8,000 hams which downloaded that image. If each one of them gave only \$2, then [The Father’s Rights Movement](#) or [Americans for Equal Shared Parenting](#) would have \$16,000 which would go a long way towards helping fathers gain equal footing in Family Court.

Donate to [TFRM HERE](#) and donate to [AFESP HERE](#). Thank you. -Dave Slotter, W3DJS
